IM
PUMP
TECH
NOLOGY

GENERAL INFORMATION

Discharge Flange	4" - 10"
Capacity	up to 840 m ³ /h
Head	up to 42 m
Working Temperature	From -25 °C to + 140 °C *
Casing Pressure (Pmax)	10 bar*

(Pmax: Suction Pressure + Shut off Head)

(*): Depending on the type of liquid, operating temperature and pressure. The pump material changes. Please contact our company for detailed information.

Transferable Liquids

- The impellers are open and have two blades and can pump solid particles up to 76 mm (3") depending on the pump size.

Shaft Sealing

- Mechanical seal is used in standard production.
- It is also possible to use soft packing depending on the customer's request or the type of liquid.

Applications

Domestic and industrial raw sewage liquid transfer	Sewage treatment plants
Liquid transfer containing sludge and solids	Factory waste water drain
	All kinds of drainage operations

Design Features

- TKF-KE and TKF-E series pumps are self-priming centrifugal pumps with flap. Since they are self-priming, it is sufficient that the pump is above the well to be suctioned, only the suction installation is in the well.
- TKF-KE are flange connected, TKF-E series pumps are threaded installation connected.
- TKF-KE series pumps can be driven by diesel engine or electric motor with elastic coupling.
- TKF-E series pumps are connected directly as monoblock to the electric motor with the pump shaft.
- TKF-KE series pumps consist of 4 different types: 4",6",8",10".
- TKF-E series pumps consist of 2 different types: 80-2.5 and 100-3.
- TKF-KE series pumps are open impeller and two vane. TKF-E series pumps have closed impeller.
- TKF-KE series pumps are very easy to unclog. Thanks to the maintenance cover that can be removed from the front, it facilitates access to the impeller, seal box and mechanical seal. It is easy to clear the blockage without any work on the suction and discharge installations.

Pump Code

GENEL BİLGİLER

Basma Flaşı	4" - 10"
Debi	840 m ³ /h 'ye kadar
Basma Yüksekliđi	42 m'ye kadar
Çalıřma Sıcaklıđı	-25 °C'den + 140 °C'ye kadar *
Gövde Basıncı (Pmaks)	10 bar*

(Pmaks: Emme Basıncı + Kapalı Vanadaki Basma Yüksekliđi)

(*): Basılan sıvının cinsine, çalıřma sıcaklıđı ve basıncına bađlı olarak pompa malzemeleri deđiřir. Ayrıntılı bilgi için firmamıza bařvurunuz.

Basılabilen Sıvılar

- Çarklar açık ve iki kanatlıdır ve pompa büyüklüđüne göre 76 mm (3") ye kadar katı partikül basabilirler.

Mil Sızdırmazlıđı

- Standart üretimde mekanik salmastra kullanılmaktadır.
- Müřterinin isteđine veya sıvının cinsine göre yumuřak salmastra kullanmak da mümkündür.

Kullanım Yerleri

Evsel ve endüstriyel ham kanalizasyon sıvı transferi	Kanalizasyon arıtma tesisleri
Çamurlu ve katı parça içeren sıvı transferi	Fabrika atık su tahliye
	Her türlü drenaj ve tahliye işlemleri

Tasarım Özellikleri

- TKF-KE ve TKF-E serisi pompalar kendinden emiřli, klapeli santrifüj pompalardır. Kendinden emiřli olduklarından pompa emiř yapılacak kuyunun üzerinde, sadece emme tesisatının kuyu içinde olması yeterlidir.
- TKF-KE flařlı bađlantı, TKF-E serisi pompalar yivli tesisat bađlantısı yapılmaktadır.
- TKF-KE serisi pompalar elastik kaplin vasıtasıyla dizel motor veya elektrik motoru ile tahriki mümkündür.
- TKF-E serisi pompalar direk elektrik motoruna, pompa miliyle monoblok olarak bađlıdır.
- TKF-KE serisi pompalar 4 farklı tipten oluřmaktadır:4",6",8",10".
- TKF-E serisi pompalar 2 farklı tipten oluřmaktadır:80-2.5 ve 100-3.
- TKF-KE serisi pompalar açık çarklı ve iki kanatlıdır. TKF-E serisi pompalar kapalı çarklıdır.
- TKF-KE serisi pompalar tıkanmayı gidermek çok kolaydır. Önden çıkabilen bakım kapađı sayesinde çarka, salmastra kutusuna ve mekanik salmastraya eriřimi kolaylařtırmaktadır. Emme ve basma tesisatlarında herhangi bir işlem yapmadan tıkanıklıđı gidermek kolaydır.
